

**But what if we had less samples / missing data?**

**Subset** every other simulated data point.

$$\begin{Bmatrix} \mathbf{x}_{unobs} \\ \mathbf{y}_{unobs} \end{Bmatrix} = \begin{Bmatrix} \mathbf{x} \\ \mathbf{y} \end{Bmatrix} \setminus \begin{Bmatrix} \mathbf{x}_{obs} \\ \mathbf{y}_{obs} \end{Bmatrix}$$
